

GOODBODY SUMMER ACADEMY

Dad's Master Teacher Guide

Summer 2025 · Miles (Grade 2) & Sabrina (Grade 5)

PART 1 — OVERVIEW & PHILOSOPHY

This guide is your teaching command center for summer. It covers curriculum goals, daily structure, subject strategies, sports goals, and the Better Yourself Project for both Miles and Sabrina. Use it alongside the individual student plans, lesson slide decks, and Goodbody Bucks reward system.

Your Students at a Glance

	MILES — Rising 2nd Grade
Strengths	Strong math intuition, energetic, curious
Focus Area	Writing — mechanics, sentence structure, creativity
Sports	Baseball — fielding, batting consistency
Learning Style	Hands-on, fast-paced, competitive
Goodbody Bucks	Earn for math streaks + writing pages + baseball goals

PART 2 — DAILY SCHEDULE TEMPLATE

Run school sessions 4 days a week (Mon-Thu). Keep Fridays light — project work, outdoor sports practice, or field trips.

TIME	ACTIVITY
8:30 – 9:00 AM	Morning Meeting — Review goals, read Goodbody Bucks balance, set daily intention
9:00 – 9:45 AM	Miles Session 1 — Core subject (use subject slide deck)
9:00 – 9:45 AM	Sabrina Session 1 — Core subject (simultaneous or alternate)
9:45 – 10:00 AM	Break — snack, movement

10:00 – 10:45 AM	Miles Session 2 — Writing or Project Work
10:00 – 10:45 AM	Sabrina Session 2 — Writing, Math, or Project Work
10:45 – 11:00 AM	Goodbody Bucks Accounting — log the app, count earnings
11:00 – 11:30 AM	Cross-kid activity — reading together, science experiment, or game
Afternoon	Sports practice, Better Yourself Project, free time

PART 3 — SUBJECT STRATEGIES

MILES — Writing Focus Strategy

Miles is strong in math — use that confidence as a bridge. Make writing feel like problem-solving: give him prompts that have a clear goal.

- Start with dictation: Miles tells YOU a story, you write it, then he copies it in his best handwriting
- Use story starters tied to baseball: 'It was the bottom of the 9th...'
- Teach one mechanic per week: capital letters, periods, question marks, commas
- Set a word-count goal per session (start at 20 words, grow to 75 by end of summer)
- Celebrate every completed page — this is a Goodbody Bucks earner
- Writing + Math combo: word problems he writes himself ('I have 7 baseball cards...')

SABRINA — All-Around Support Strategy

Sabrina needs concept mastery before speed. Never rush to the next topic until she signals she's got it. Use the 'Teach It Back' method — she explains a concept to you to confirm understanding.

- Pre-teach vocabulary before every lesson so she's not fighting words AND ideas
- Math: use manipulatives (coins, blocks, graph paper) — visual + physical reinforces abstract
- Reading/ELA: read alongside her, not to her — take turns paragraph by paragraph
- Science/Social Studies: connect to real life ('What would this look like if we saw it outside?')
- Use the 'Teach It Back' check: if she can explain it to you simply, she owns it
- Earn Goodbody Bucks for effort AND mastery — not just completion

PART 4 — GOODBODY BUCKS INTEGRATION

Use the Goodbody Bucks web app at goodbodybucks.web.app to track earnings. Record transactions each school morning during the 10:45 accounting block. Turn the app into a financial literacy lesson — they earn, save, and spend.

EARN BUCKS FOR...	MILES
Completing a full lesson	5 GBB
Writing a full page / paragraph	10 GBB
Math challenge solved	5 GBB
Teach It Back successfully	8 GBB
Sports goal achieved (weekly)	15 GBB
Project milestone completed	20 GBB
Perfect week (all 4 days)	25 GBB bonus
Helping your sibling learn	10 GBB

Financial Literacy Mini-Lessons (do one per week during accounting block):

- Week 1: What is money? What are Goodbody Bucks?
- Week 2: Saving vs. spending — set a savings goal
- Week 3: Earning — how does work = reward?
- Week 4: Budgeting — if you have 100 GBB, how do you split it?
- Week 5+: Interest simulation — Bucks in 'savings' grow 5% per week

PART 5 — WEEKLY SUBJECT ROTATION

Use the [subject_id] PPTX template to run each lesson. Rotate subjects weekly so neither kid gets bored. Suggested 4-week rotation:

WEEK	MILES FOCUS
Week 1	Math (Place Value) + Writing Mechanics
Week 2	Writing (Sentences) + Math (Addition/Subtraction)
Week 3	Reading (Phonics) + Math (Word Problems)
Week 4	Science (Plants/Animals) + Creative Writing
Weeks 5-8	Repeat rotation with harder versions of each topic

PART 6 — ASSESSMENT & PROGRESS TRACKING

No formal tests — use these low-pressure checks to track growth:

- Weekly 'Show Me' — kid demonstrates one skill learned that week
- Writing portfolio — keep every piece of writing in a folder; compare Week 1 vs Week 8
- Math fact fluency timing — 1-minute timed fact check, track improvement
- Teach It Back sessions — Sabrina especially, confirms deep understanding

- Sports video review — record practice once a month, review goals vs. actual
- Project journal — photo or written log of Better Yourself Project progress
